

On-time is key for your operation

As MRO for world's largest tour operator TUI Travel PLC, we are able to offer the knowledge and capabilities to serve you with the same quality, urgency and attention.

We know the importance of a serviceable fleet. Airplanes are the key tools for an airline to earn money. Therefore it is essential for an airline to have airplanes in the air as much as possible.

When, in the uneventful occasion, your airplane suddenly ends up into an AOG situation, you need to rely on a maintenance provider that gets your airplane airborne in the shortest possible time. You need a maintenance provider that understands the airline operation.

Anytime

No matter when it happens, our teams of specialists are ready to respond to any AOG situation 24 hours a day, seven days a week.

So when you need it most, Tec4Jets we will support you throughout our network of maintenance stations.

Our experienced engineers are trained to independently handle all the critical situations with support of our Maintenance Control Center at Brussels National Airport.

Trust

Unplanned maintenance needs are not only inconvenient; most of the time they are very costly as well.

Often these are not only represented in direct costs. What about the indirect costs of positioning or even hiring a replacement airplane to cover the operations and putting your passengers in hotel accommodations?

We fully understand that trust in a maintenance provider is the key to keep these unwanted costs within acceptable levels.

In case of an AOG situation do not hesitate to contact our Maintenance Operations Center:

Understanding airline operations

A continuous safe operation, on time performance and sound cost management are key factors in airline operations and are main contributing factors in the company's image.

Sometimes it proves hard to maintain a perfect on time performance and maintain acceptable cost levels, especially when your airplane is away from home base.

If you need transit checks, daily or weekly checks, or just engine oil or spare parts, our line maintenance organization provides the basis for your reliable operations.

Able to meet your needs

Throughout our network of maintenance stations we can offer all kinds of support. From transit to daily and weekly checks, ETOPS and non-ETOPS.

All maintenance stations are provided with all necessary line maintenance tools and materials to get your airplane airborne within those acceptable costs, safe and on time!

We will support you throughout our network of maintenance stations. Our experienced engineers are trained to handle all line maintenance tasks with the highest safety standards.

Where to find us

Our network of maintenance stations are ready to support your operations Tec4Jets operates from airports throughout Belgium, France, Morocco and the Republic of the Congo.

Tec4Jets is determined to adapt to future requirements of our clients. For an up-to-date overview of our capabilities and stations we would like to refer to our latest capability list available on our website www.tec4jets.com.

All our services are available contract or ad-hoc basis.

Base Maintenance Services

Your business card is an airplane in perfect condition

Rain, snow, wind and dust; these are examples of all kinds of conditions that are not preferable when you need to perform certain types of maintenance on airplanes. Also other factors, like the type of maintenance you will perform make it mandatory to park the airplane into a fully enclosed hangar.

At our main base at Brussels National Airport we have a state-of-the-art airplane hangar available to perform maintenance on your airplane in a dry and clean environment.

Planning is the key

Based on your utilization and maintenance planning, we will search for the best maintenance slots

available to perform your line and base maintenance checks.

This interaction and continuous coordination will ensure your maintenance and airplane availability to be optimal.

Hangar

Our new state-of-the-art hangar combined with office space and storage facilities is located at Brussels National Airport. The facility is large enough to accommodate up to 2 wide bodies; 1 wide body and 2 narrow bodies; or 4 narrow bodies airplanes.

Storage

Tec4Jets main storage facility in Brussels is approximately 2,000m² and is used for bonded stores,

incoming goods inspection and quarantine area, and has segregated areas for serviceable and unserviceable material.

Components are well identified and protected against damage and deterioration. The complete area has sufficient lighting and is well ventilated, heated and lockable.

Facts & figures

- ← Size: 117m x 85m x 26/30m
- ← Hangar space: 9,950m²
- ← Office space: 11,500m²
- ← Storage space: 2,000m²
- ← Maximum free span: 112m

Feel free to contact us to see if your airplane can enter our brand new facility.

How to Support you

We are committed to get you airborne as soon as possible. Therefore it is important for you to know what we can do for you.

Our capabilities include:

- ☞ Transit, daily, weekly inspections
- ☞ ETOPS inspections
- ☞ Base maintenance up to but not including C-checks
- ☞ Bird strike inspections
- ☞ Boroscope inspections
- ☞ Engine changes
- ☞ Mechanical and system failures
- ☞ Hangar space
- ☞ Cabin reconfiguration
- ☞ Technical training

Fleets and engines

We are aware of the fact that we can only support airlines with high quality by actually working on airplanes on a regular basis. This means that we will not support all type of airplanes coming into our station.

Our opinion is that quality counts and not quantity.

We currently support the following type of airplanes and engines:

- ☞ Boeing 737-3/4/500 (CFM56)
- ☞ Boeing 737-6/7/8/900 (CFM56)
- ☞ Boeing 767-2/300 (PW4000)
- ☞ Boeing 767-2/300 (CF6-80)
- ☞ Boeing 787 (GEnx)
- ☞ Embraer E170/175 (CF34)
- ☞ Embraer E190/195 (CF34)

To be sure that we support your airplane in a Tec4Jets line maintenance station, please download our latest capability list from our website www.tec4jets.com.
